

# Evaluations & Approvals

Convert vendor and sourcing activities into automated evaluations or approvals that help drive compliance and transparency over business spend.

Build evaluation templates using tailored financial and non-financial weighted criteria, making it easy to connect teams and analyse vendor performance. Teams can also categorise approval requirements using new or pre-configured workflows to assign tasks for RFX Approval or Recommendation for Award. Get approvals from the right people, at the right time.

## Evaluations

Create evaluation committees, analyse vendors and compare apples-to-apples quotes using configurable templates and weighted criteria.

## Approval Workflows

Generate custom workflows with flexible routing structures that progress as key members sign off. Track the status of each workflow and identify bottlenecks to approval.
