

Vendor Relationship Management

Streamline all your vendor information in one place and leverage real-time data about your entire supply chain.

With Vendor Profiles, you can access vendor information, service details, unique tags, compliance documents, and review a chronological interactions history. Work together to evaluate vendor performance and keep your teams connected.

Vendor Profiles

Capture, store and grow knowledge about vendors.

Service Categories

Keep goods and services uniformly categorised.

Compliance Monitoring

View, validate and remind vendors about compliance information.

Vendor Tags

Identify unique business attributes about your vendors.

Interactions log

Auditable trail of all activity between your users and vendors.

Performance Scores

Build configurable weighted criteria to evaluate vendor performance.
